

AiFinPay Protocol Documentation

The official documentation ecosystem for the **AiFinPay Paywall Protocol (AIFP)** — an application-layer payment protocol on top of HTTP that lets autonomous AI agents pay for content, data, and APIs automatically, with no human in the loop.

Documents

#	Document	Audience	Read it for
02	Merchant Integration Guide	Backend engineers	Integrate AIFP in production frameworks
03	AI Agent SDK Specification	Agent developers	Auto-pay flow, wallets, budgets, multi-chain, Passport
04	Security & Cryptography Specification	Security engineers	Threat model, signatures, replay, key rotation, compliance
05	Whitepaper	Investors, enterprises, partners	Protocol vision, market, model, roadmap
06	AIP — Improvement Proposal Process	Contributors, maintainers	Governance, lifecycle, versioning, compatibility
07	Quick Start Guide	New developers	Merchant, agent, wallet quick starts
08	OpenAPI 3.1 Specification	API consumers, tooling	Machine-readable API source of truth
09	Postman Collection	API testers	Quote, Pay, Receipt, Merchant, Wallet, Verify requests
10	JSON Schemas	Tooling, validation	Schema definitions for protocol objects
11	SDK Reference	Developers	Classes, methods, events for SDKs
12	Developer Portal Structure	DevRel, docs team	Portal IA, navigation, search, sandbox
13	Branding Guidelines	Everyone	Naming, color, typography, code and doc style
14	Ecosystem & Governance	Partners, foundations	Open-standard strategy, governance, certification
15	Repository Architecture	Maintainers	GitHub org layout, CI/CD, templates, contribution flow

Pricing Summary

Agent Action Tier	Starts From	Typical Action
Complex	\$0.00006	Search, aggregation, multi-source queries, higher compute
Premium	\$0.00010	AI inference, GPU workloads, deep analytics, premium data

AiFinPay charges a **1% protocol fee** on every successful transaction. The remaining **99%** is settled to the merchant, excluding any applicable payment network or settlement costs.

How They Fit Together

- **Document 01 governs.** It is the normative spec. All other documents are conforming guidance; on any conflict, AIFP-1 wins.
- **Single sources of truth.** API → Doc 08. Object shapes → Doc 10. SDKs mirror Docs 08/10. Postman mirrors Doc 08.
- **Repository architecture.** Doc 15 describes the official GitHub organization layout and repository standards.
